

## MEASURING PIPE W/CONCRETE DOME

How the determine which sleeve size to order:

1. Measure the circumference (distance around the post)
2. Take that dimension and divide by pi (3.14)

Example: Circumference is 21 "
Divide by 3.14
Pipe Size is $6.625^{\prime \prime}$
3. Find your pipe size in the chart below and see what Ideal Sleeve Size matches your Pipe OD (pipe size)

Example cont'd: If your Pipe Size is 6.625 ", the Ideal Sleeve Size you will need is $6^{\prime \prime}$

## SIZE CHART

Pipe OD $|$

| $31 / 2{ }^{1 /}$ | 3" | 3 5/8" | 11" | 3" |
| :---: | :---: | :---: | :---: | :---: |
| 4" | $31 / 2{ }^{\prime \prime}$ | $41 / 8 "$ | $121 / 2{ }^{1}$ | $31 / 2{ }^{\prime \prime}$ |
| $41 / 2{ }^{\prime \prime}$ | 4" | 5" | 14"-15" | 4" |
| $51 / 2{ }^{\prime \prime}$ | $51 / 2{ }^{1 /}$ | 6" | $17 \frac{1}{2}{ }^{\prime \prime}$ | 5" |
| 6 5/8" | 6" | 7" | $201 / 22^{\prime \prime}-21^{1 / 2}$ | 6" |
| $71 / 2{ }^{1}$ | $71 / 2^{\prime \prime}$ | 8" | 24" | 7" |
| 8 5/8" | 8" | 9" | 27"-27 1 ²" | 8" |
| 10 3/4" | 10" | 11" | 34"-34 ½" | 10" |
| $123 / 4$ " | 12" | 13" | 37 5/8" | 12" |
