## SUPER CARPET FRESH

### DOSING GUIDELINES – SUPER CARPET-FRESH™ LIQUID CARPET, UPHOLSTERY, & FABRIC CLEANING SHAKE WELL BEFORE EACH USE

(ALWAYS TEST AN INCONSPICUOUS AREA FOR COLORFASTNESS BEFORE PROCEEDING)

Residential/Commercial	Carpet cleaning - Large area cleaning with extraction machine	Put in reservoir and extract as normal	2-4 oz. per gal. of water DO NOT RINSE
Residential/Commercial	Carpet cleaning - Large area cleaning with bonnet cleaner	Put in sprayer and apply to surface – clean as normal	2-4 oz. per gal. of water DO NOT RINSE
Residential/Commercial	Carpet cleaning - Pre-spray for tough stains	Put in sprayer and apply until wet right through the carpet – follow up with extraction with mixture	2-4 oz. per gal. of water DO NOT RINSE
Residential/Commercial	Spot cleaning carpet, upholstery, fabric, mattresses, etc.– organic stains of all kinds including: grease, oil, milk, coffee, wine, tea, chocolate, urine, body fluids, perspiration, vomitus, blood, pet stains, etc.	Spot cleaning – spray to soak area, (at least 5 x area of stain on carpet through carpet & backing, deep to floor), agitate, (allow longer dwell time for tougher stains) press a clean paper towel over carpet/fabric to draw up the dirt & excess fluid, allow to air dry; and vacuum	2-4 oz. per gal. of water DO NOT RINSE
Residential/Commercial	Odor treatment (smoke, urine, animal odor, perspiration) – Drapes, bedspreads, etc.	Spray on surface areas until damp and allow to air dry. Follow up with extraction as above.	4 – 8 oz./gal. of water DO NOT RINSE
Residential/Commercial	Laundry pre-spotting treatment, pre-soak treatment	Spray to wet area, let soak overnight, then wash as normal	2-8 oz. per gal of water DO NOT RINSE

### FABRIC & CARPET CLEANER/MOLD & MILDEW CONTROL (FOR LONG TERM EFFECT FIND & ELIMINATE SOURCES OF MOISTURE)

Residential/Commercial	Carpet, upholstery, draperies, clothing – all surfaces	Spray to soak, brush, wait 15-20 minutes, and wipe material, steam clean with product in reservoir (2 – 4 oz/gal) - let air dry.	Dilute at 2:1 – 10:1 (2 - 10 parts water to 1 part product) DO NOT RINSE
------------------------	--	--	--

This product is also very effective for odor control for the worst organic odors. FORSKUNK - dilute it at 8 - 16 oz./Gallon of warm water. Spray directly on pet as a shampoo – rub it in, WAIT 5 MINUTES, then rinse. For less strong odors dilute it at 4 - 8 oz./Gallon of warm water for residual odors and spray all affected surfaces. DO NOT RINSE. Eliminates skunk,smoke,andevenhockeyandothersportsbag&equipmentodors.

**SUPER CARPET-FRESH™ OUTPERFORMS TRADITIONAL CLEANERS AT A FRACTION OF THE COST** - Check out the value and see for yourself, you can replace most of your spray cleaners with EATOILS™ SUPER CARPET-FRESH™ for less than 1/10 of the cost of alternative products – one quart will make up to 70 quarts of spray cleaner – and it will outperform those other products too!

## SUPER CARPET FRESH

**EATOILS™ SUPER CARPET-FRESH™ - FREQUENTLY ASKED QUESTIONS APPLIES EQUALLY TO CARPET, UPHOLSTERY, FABRIC, ETC.**

### **HOW LONG DOES IT TAKE TO GET MY CARPET CLEAN & ODOR FREE?**

Food particles that build-up in carpets, backing, in the under pad and on the floor beneath can be removed in 1-2 applications using the product at 2 oz. per gallon in a carpet extractor type machine. Just pre-treat the 'most dirty' areas with our product and follow up with your carpet extractor – **then allow the carpet to air dry** - the microbes will continue to work on and eliminate the 'food' particles – **they keep on working long after you're done!**

For spot treatment applications, e.g. (**4" surface stain**) soak the area with the concentrate (**1-2 oz.**), then pour a quart of water onto the stain (to soak the carpet, backing, under pad & floor) – always wet an area at least 5 times the size of the surface stain (most stains spread out in all directions and they will 'wick' up to the carpet surface as they dry - so you want to go past the edge of the underlying stain to capture all of the residue and prevent the mark from re-appearing as it dries). Then, agitate the carpet to ensure that the product is in contact with all food material. After waiting 10 - 20 minutes, lay a towel or paper towels on the surface and press down on the stain area to draw the fluid & contaminants out of the carpet. Allow the area to air dry. Repeat as necessary to remove all residual discoloration.

For bonnet cleaning applications, pre-mix the product (2 oz. per gallon) and spot treat the carpet on a regular basis.

Have you ever found that other cleaners seem to allow the carpet to re-soil easily? There is a special ingredient in **SUPER CARPET-FRESH™** that minimizes re-soiling, so your carpets stay cleaner, longer.

### **WHAT HAPPENS TO THE ODOR PROBLEM?**

When you use **EATOILS™ SUPER CARPET-FRESH™** to clean and deodorize an area you are inoculating the area with microbes that attack the sources of odors and destroy them deep down in the fibers of the carpet, backing, underpad and on the floor below within minutes. Our microbes actually destroy the tiniest food particles so that the other, odor causing bacteria don't have a chance to get started on the food. When the food is gone, the area is truly clean and odor free until new food is introduced. Other products tend to mask odors and consequently they have a limited effect on the sources of odor. This product is designed to remove all forms of organic odors including, milk, vomitus, urine, perspiration, wine, coffee, pet odors & accidents, smoke, etc.

### **WHAT IS DIFFERENT ABOUT THIS PRODUCT? HOW CAN I TELL THAT IT IS WORKING?**

Most chemical cleaners rely on either VOC's (volatile organic compounds – solvents, etc.) or strong chemicals to do the cleaning – once you finish cleaning the carpet they are finished! While they are initially good at cleaning the surface stain, they have little or no effect on the underlying food on the carpet backing, underpad, & floor.

**EATOILS™ SUPER CARPET-FRESH™** cleans & removes all the dirt & residue from the carpet, then, the microbes in the product get to work. These microbes will eat all organic food materials on all surfaces and remove the messy, smelly conditions that they cause. As long as there is food material in the area, our microbes will keep on working long after you're done to clean your carpet.

A simple test of how well our product works is this – at the end of your cleaning shift with your current product, smell your waste water – it will probably smell of mold and mildew as the bacteria from the carpet are in your waste water growing & multiplying. Now smell the wastewater with our product – the water will smell clean and fresh – the microbes are working on the food particles throughout your carpet cleaning in the same way as they are cleaning your wastewater. Now, pour your left-over wastewater down your slowest moving drain – the microbes will clean the drain & keep it running freely! How's that for getting the most out of your product?

### **HOW DO THE MICROBES IN THE PRODUCT WORK? WHERE DOES THE STAIN GO?**

When the microbes come in contact with food, they secrete a series of enzymes that digest the food breaking it down into harmless invisible gasses (hydrogen, oxygen, water vapor) and carbon. The microbes eat the carbon and breathe it out as carbon dioxide - another harmless invisible gas. In a nutshell here's the magic: you start with an ugly, smelly mess – a dirty carpet or upholstery, etc., after using our **EATOILS™ SUPER CARPET-FRESH™** the odor is gone, the carpet has returned to its original color and you have replaced that smelly mess with: 1) invisible, harmless gasses and 2) beneficial microbes that keep on working long after you're done to keep the carpet & fabric clean.
